NFC Scibe

🌈 Full Color   ✳ Laser Engraved

(Item No: 720)

This sleek executive pen features NFC technology for seamless wireless data transfer to smartphones or tablets. Its soft-touch oval barrel ensures writing comfort, with smooth black ink. Each pen is programmed with a single URL, and with a dynamic URL, you can easily update it and track results to keep your campaign fresh and maximize ROI. Each pen comes in a polybag with clear directions.

Directions

- Ensure NFC is enabled on compatible devices (iPhone 11 & up, Android 13 & up)
- Tap and hold the NFC symbol on the pen to the NFC-enabled area on your device
- Your device will automatically recognize the signal and open the programmed URL
- Tap the link to access your content

Poly-bagged with instructions.

How to use your NFC-enabled pen with your smartphone:

1. Enable NFC in compatible smartphone settings.

2. Tap the NFC receiver on the smartphone against the NFC area of the pen located below the plunger.

*NFC area of ANDROID smartphone is in the middle. *NFC area of iPhone is on at the top left side.

3. Hold the smartphone steady until the content programmed in the NFC tag is picked up and loaded.
